May 2024

# NEPT Enhancements

On Thursday 9 May 2024 between 0500 – 0600 a set of enhancements are set to be released to production NEPT. The change will take approximately 15 minutes to complete.

NEPT will continue to be available during this time, however users may experience intermittent performance issues during the change period.

Facilities are to call QAS on 13 12 33 if your NEPT request does not submit during this time.

The following pages will detail what each enhancement is and the associated changes.

# Create Return/Discharge for Now

Feedback from facilities indicated they wanted the ability to quickly create a date and time for return now.

This enhancement allows a user to tick a box 'Create for now' which populates the date and time for transport as 'Today' +10 minutes'.

# Patient Ready Now Button

A new enhancement has been created to have the 'Patient Ready Now' button be available on all active return and discharge trips, regardless if a time has been updated from 23:59.

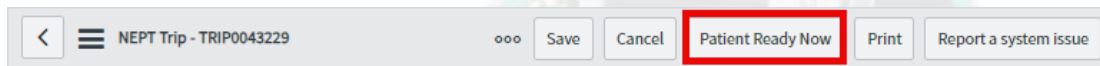

This enhancement will allow for QAS to pre-populate a return trip time for their planning and coordination processes and allows for a facility to press the button to update the time to when the patient is actually ready for return.

# Return Trips

Where the 'To Appointment' transport type is selected the checkbox for 'Is a return trip required?' is now a mandatory 'Yes' or 'No' selection.

This has been implemented to ensure the creation of a return trip is not missed when a trip into an appointment is created.
